

PROFESSIONAL DEVELOPMENT & SUPPORT FROM LEVEL

Data Analytics from Level integrates professional development and a #1 ranked Career Service Network to help support your career goals during and after the program.

We know your primary goal is to take the next step in your career, and our team is dedicated to providing the support you need to get there. Our curriculum was developed by industry partners, and we work to ensure that you have the opportunity to build your network and portfolio of work. We don't just want you to graduate with skills, we want you to graduate with a resume.

INSTRUCTOR & TA SUPPORT

During your time in the Level program, you are encouraged to leverage your instructor and TAs for support as you move through the curriculum. TAs are available every day and night of the week to help you work through any questions that come up outside of class, and are available for scheduled, 1:1 office hours.

STUDENT SUCCESS

Each student in the Level program is assigned a student success manager, who checks in with the student throughout their time at Level, and is available for personal and professional support during and after the program.

NORTHEASTERN CAREER SERVICES NETWORK

Northeastern University is home to the #1 ranked Career Services Network in the United States, and as a Level student, you have full access. You can leverage the CSN for career coaching, mock interviews, resume and cover letter support, career planning and more. You can also attend career fairs that Northeastern hosts both on-site at our campus hubs and virtually.

ADDITIONAL SUPPORT

All Level students are assigned Slack accounts, a communication channel you can use to get in touch with your classmates and teaching staff outside of class. You will also have access to an online syllabus to keep up to date with the weekly readings and assignments. All of your readings, assignments and important notes for downloading the software and accessing your included license keys will be provided to you and hosted in your class portal, called Acrobatiq.

MENTORSHIP

Students enrolled in Level have the opportunity to join the Level Alumni and Mentorship network, where they will be paired with mentors who have gone through the program before. Mentors are able to share their experiences in the field, offer support and advice, and help expand the student's professional analytics network.

CAREER ACTION WORKSHOPS & COACHING

Along with intensive skills training, there is a great deal of professional development built into the Level programs. Career action workshops are hosted online and cover best-practice in interviews, resume writing and more. Level students also have the ability to work with a 1:1 career coach for personalized support.

NETWORKING & EVENTS

Having a network can take you far in your career, especially when backed by the power of Northeastern's 27,000+ alumni. We host a variety of events both on campus and online, where we bring in guest speakers, data analytics and science experts and technical recruiters to help facilitate making those important connections.

How Do I Apply?

Visit leveledu.com to review the program details and get started on an application. Please use your work email address to receive Level discount. If you have any questions, please email sam@leveledu.com.
